

NASA SPACE APPS CHALLENGE BANGLADESH NETWORK

UNIVERSITY CLUB PARTNER TERMS & CONDITIONS

For Promotion & Community Outreach of the 9 Regional Local Events

This document sets out the proposed terms, opportunities, responsibilities, and restrictions for university student clubs participating as University Club Partners of the NASA Space Apps Challenge Bangladesh Network. It is designed to align partner activities with the applicable NASA Space Apps Challenge Local Lead, Navigator, participant, and brand guidance.

1. Partnership Designation

- The club may identify itself as a “University Club Partner of the NASA Space Apps Challenge Bangladesh Network” for the designated regional Local Event.
- The partnership is a community and promotional collaboration. It does not make the club, its officers, members, mentors, or volunteers employees, agents, representatives, or official spokespeople of NASA.
- The partner designation should always be used with the relevant regional Local Event where applicable.

2. Opportunities for University Club Partners

- Receive recognition as a University Club Partner within the Bangladesh Network and the designated regional event.
- Support and promote a major international hackathon experience among university students and the wider innovation community.
- Access approved promotional materials, campaign information, event updates, and participation guidance supplied by the local organizing team.
- Build networking opportunities with students, organizers, mentors/Navigators, judges, collaborators, technology communities, and other university clubs.
- Receive participation/partner recognition or certificates where offered by the regional organizing team.
- Highlight the club’s contribution to innovation, technology, STEM, problem-solving, community engagement, and student development.

3. Core Responsibilities

- Promote the designated regional Local Event through the club’s approved communication channels.
- Share accurate event information, including dates, registration instructions, eligibility, deadlines, and official links supplied by the organizers.
- Encourage students to register and participate voluntarily.
- Avoid making promises about prizes, selection, judging outcomes, NASA employment, sponsorship, or other benefits that have not been officially confirmed.
- Coordinate with the regional organizing team before publishing materials that materially change official event information.

- Maintain professional, respectful, inclusive, and student-friendly communication.

4. Regional Scope

- A University Club Partner should primarily promote the regional Local Event assigned to it.
- The club must not represent itself as the organizer or Local Lead of another city/region unless separately authorized.
- Any cross-regional campaign or joint promotion should be coordinated with the relevant organizing teams.

5. NASA & Space Apps Branding

- Partners must follow the NASA Space Apps Challenge brand guidance when using Space Apps logos, fonts, colors, graphics, and other approved visual assets.
- Partners must not use the NASA Insignia (meatball), NASA Logotype (worm), NASA mission logos, or partner-agency logos unless expressly authorized.
- Partners must not alter, recreate, distort, or combine official NASA identifiers with club or commercial branding in a way that suggests NASA endorsement.
- Use the approved NASA Space Apps Challenge branding rather than implying independent authorization to use NASA identifiers.

6. No False Representation

- The club must not state or imply that it is an official NASA organization, NASA office, NASA employee, NASA agent, or NASA-appointed university.
- The club must not claim that NASA directly sponsors, funds, endorses, approves, or guarantees the club, its activities, or any commercial offer unless such statement is expressly authorized.
- The club must not negotiate agreements, sponsorships, financial arrangements, or commitments on behalf of NASA or the NASA Space Apps Challenge.

7. Promotion & Content Restrictions

- Promotional content must be factual, respectful, and consistent with official event information.
- Do not publish misleading claims, fake registration links, fabricated announcements, or unapproved prize/selection information.
- Do not use the Space Apps name or branding to advertise unrelated commercial products, services, political campaigns, or personal fundraising activities.
- Do not publish offensive, discriminatory, harassing, sexually explicit, threatening, defamatory, or otherwise inappropriate content in connection with the partnership.
- Any AI-generated or third-party content used in campaign materials must not misuse NASA or Space Apps branding and should comply with applicable event guidance.

8. Free Participation & Fees

- NASA Space Apps participation is free. A University Club Partner must not charge students a participation or registration fee for access to the NASA Space Apps Challenge Local Event.

- The club must not collect money from participants by presenting a fee as an official NASA Space Apps or regional event requirement.
- Any optional third-party activity or service must be clearly separated from official event participation and must not be presented as mandatory.

9. Fairness, Selection & Favoritism

- Partners must not guarantee or influence participant selection, team selection, judging, awards, nominations, or winner decisions.
- Partners must not provide unfair access or preferential treatment to selected students, clubs, friends, sponsors, or organizations.
- Mentors, volunteers, and partner representatives should provide guidance fairly and should not use their role to promote personal or commercial interests.

10. Mentor / Navigator Restrictions

- A club may recommend qualified mentors or volunteers to the regional organizing team, but appointment or role designation remains subject to organizer requirements.
- A mentor/Navigator must not present themselves as a NASA representative, employee, or agent.
- Mentors/Navigators must not negotiate or broker financial, promotional, or other agreements on behalf of NASA or the NASA Space Apps Challenge.
- Mentors should support learning and problem-solving without completing a participant's project for them or unfairly influencing judging.
- Mentors/Navigators must uphold safety, integrity, teamwork, excellence, inclusion, and respectful conduct.

11. Sponsorship & Commercial Restrictions

- University Club Partners may not independently sell sponsorship packages using NASA or Space Apps branding.
- Any sponsor, commercial partner, paid promotion, or brand activation connected to the regional Local Event should be coordinated with and approved by the responsible local organizing team.
- Partners must not suggest that a commercial relationship has NASA approval or endorsement unless expressly authorized.

12. Participant Data & Privacy

- Partners should collect only the information necessary for legitimate club outreach or event coordination.
- Participant contact information must not be sold, rented, publicly disclosed, or used for unrelated marketing without an appropriate legal basis and consent.
- Official registration should be directed through the official event registration process rather than through unofficial forms whenever instructed by the organizers.

13. Participant Projects & Intellectual Property

- Partners must not claim ownership of participant projects, code, designs, datasets, presentations, or other Solution Materials merely because they helped promote or mentor participants.
- Participants remain responsible for having the rights necessary to use their project materials and for citing sources as required by official Space Apps rules.
- Partners should not request confidential project information or use participant work for commercial purposes without appropriate permission.

14. Photography, Video & Publicity

- Partners may document promotional activities and events only in accordance with applicable organizer instructions, privacy requirements, and consent practices.
- Do not imply that photographed or filmed participants have endorsed a club, company, product, or service merely because they attended the event.
- Any materials submitted to the organizers for official use should have the appropriate permissions/releases where required.

15. Professional & Inclusive Conduct

- Partners must maintain a safe, respectful, inclusive environment.
- Bullying, harassment, discrimination, intimidation, favoritism, hate speech, and other misconduct are not permitted.
- Concerns involving safety, harassment, serious misconduct, or misuse of branding should be promptly reported to the regional organizing team.

16. Partner Exclusivity

- A University Club Partner is not automatically an exclusive partner of a region, university, or category unless a separate written agreement states otherwise.
- The organizing team may work with multiple university clubs, communities, collaborators, and organizations to broaden participation.

17. Promotional Material Approval

- The regional organizing team may request changes to any promotional material that is inaccurate, misleading, inconsistent with brand guidance, or otherwise inappropriate.
- Partners should use official assets and information supplied by the organizers whenever available.
- Failure to correct non-compliant material may result in suspension of partner recognition.

18. Suspension or Termination

- The regional organizing team may suspend or terminate the partnership if a club materially breaches these terms, misuses branding, misrepresents its relationship with NASA, engages in misconduct, or harms the integrity of the event.
- Termination does not prevent the organizers from taking further action where required by applicable law or official Space Apps rules.

19. No Guaranteed Benefits

- Recognition, certificates, networking opportunities, promotional exposure, access to specific sessions, or other partner benefits are subject to availability and organizer discretion.
- Being a University Club Partner does not guarantee participation, prizes, judging outcomes, selection, employment, sponsorship, or any relationship with NASA.

20. Acceptance

- By applying for or accepting University Club Partner status, the club and its designated representatives agree to follow these terms and any applicable instructions issued by the regional organizing team.
- Where official NASA Space Apps Challenge terms or brand guidance are updated, the most current applicable official guidance should take precedence over any conflicting wording in this partner document.

Important Official Guidance

This partner document is a local/network-level framework and is not a NASA-issued contract. It should be read together with the current official NASA Space Apps Challenge terms and brand guidance. Official guidance emphasizes correct Space Apps branding, restrictions on NASA identifiers, the prohibition on implying NASA representation or endorsement, free participation, and values including safety, integrity, teamwork, excellence, and inclusion.
